

➤ **LIGHTWEIGHT PALLET NET**

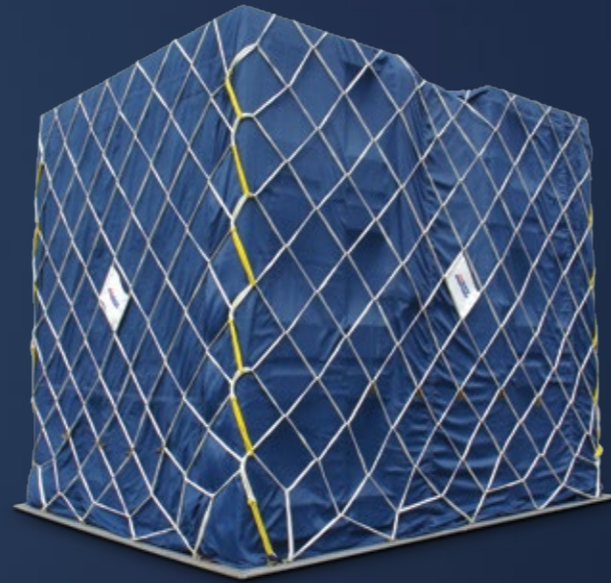

AMSAFE BRIDPORT

THE REVOLUTIONARY LIGHTWEIGHT PALLET NET, MADE WITH DYNEEMA®

LIGHTWEIGHT, TOUGH AND DURABLE

AMSAFE BRIDPORT'S Lightweight Pallet Net offers the industry an environmental and socially responsible option in the management and transportation of airfreight shipments.

The Industry Demands

IATA reports that, globally, the commercial airlines fuel bill was \$209 billion in 2012, an increase of \$33 billion on the previous year, and this continues to grow. Fuel now represents 33% of the operating budget of commercial airlines.*

With these seemingly ever increasing fuel costs, coupled with heightened environmental concerns, the aviation industry demands air cargo solutions that are lighter in weight – without compromising the safety and security of its cargo, operational handling staff and, ultimately, its passengers.

The AmSafe Bridport Solution

Working with DSM and utilising the world's strongest fibre, Dyneema®, we have pooled our expertise to develop the AmSafe Bridport Lightweight Net.

Working with the advantages of this fibre, and our expertise and processes in the manufacture of the product, our lightweight nets not only offer a 50% weight saving in comparison to existing pallet nets, but the product has an extension in certified lifetime to 5 years in comparison to the current standard of 3 years.

VASTLY IMPROVED ANTI-ABRASION QUALITIES

Dyneema® is a trademark of DSM, use of this trademark is prohibited unless strictly authorised. *Source article – <http://www.ibtimes.com>. # Guide weight based on 118" PMC.

Key Features & Benefits

- ⊕ The Lightweight Pallet Net weighs only 9 kg
- ⊕ Reduced repair rates contribute to a lower total cost of ownership
- ⊕ Complete with 5 year certified life
- ⊕ Fuel costs are significantly reduced due to a decrease in weight
- ⊕ Lower fuel burn creates less CO₂ emissions and reduces the impact on the environment
- ⊕ A lighter pallet net improves the health and safety of your ramp workers
- ⊕ Operational handling time is vastly improved
- ⊕ Greater tensile strength – Dyneema® fibre is 15 times stronger than steel (weight to weight)

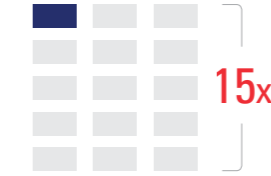

Our Expertise

AmSafe Bridport is the leading supplier of cargo pallet nets to the world's major airlines and cargo operators. Our comprehensive range of pallet nets is recognised worldwide as being the safest and most cost-effective cargo restraint solution in the industry.

Our in-depth knowledge and understanding of cargo containment enables us to provide a breadth of solutions to meet our customers most challenging transportation requirements.

5 year certified life compared to 3 years as standard

Tensile strength 15 times stronger than steel

The Facts Illustrated

Weighs only 9 kg – 50% lighter than a standard pallet net

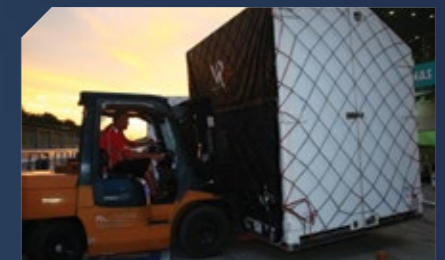

210 gallons of fuel saved per year per net

3 WAYS IN WHICH YOU SAVE

Reduced fuel costs

Higher operational durability

Less maintenance

Our cargo nets are built to last – it's a fact. This is one of the reasons we are the market leader for cargo safety and restraint solutions.

Airline Approved

We are very proud that the AF-KLM group are the first to commit to fully converting their fleet to the AmSafe Bridport lightweight nets with Dyneema®. After several years of developments, including extensive trials with all three parties, we have a product that is fully certified by the authorities, which improves the ease of operational use and provides considerable savings to both fuel and carbon emissions.

Camiel Eurlings, CEO KLM

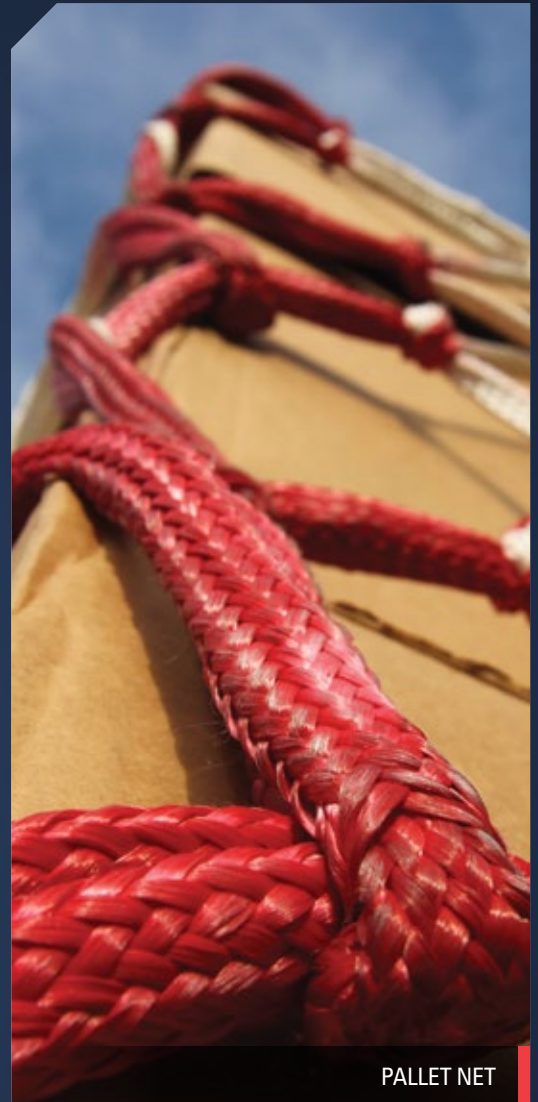

AmSafe Bridport Approved

The movement of air freight and cargo around the globe is under constant scrutiny. Industry has demanded attention be given to the development of revolutionary products that help fight rising costs and environmental concerns. We have answered this with our lightweight pallet net.

Joe Ashton, Cargo Product Group AmSafe Bridport
