

➤ PROTECTING YOUR INVESTMENT

Tarian® QuickShield™

Tarian® QuickShield™ is a lightweight Rocket Propelled Grenade (RPG) armour net that replaces damaged or missing bar armour. The QuickShield kit is easily stowed in any vehicle and when needed, it can be immediately fitted by the crew. QuickShield ensures vehicles and crew remain protected against RPG threats with no disruption to their mission, and allows inactive vehicles waiting for bar armour repairs to be immediately returned to operational service, with no loss of protection.

QuickShield enables vehicles with damaged bar armour to be instantly repaired and to continue the mission with no loss of protection

QuickShield utilises the same proven technology of the Tarian RPG Armour System which has been in service in Afghanistan since 2009. Like Tarian, QuickShield provides lightweight, high performance RPG protection. QuickShield will provide RPG protection on vehicles for up to six months before it should be replaced by another kit.

The QuickShield kit contains a vacuum-packed net together with fastening materials and simple installation instructions. Standard QuickShield kits are available in two sizes: a small kit with nets sized at 100cm x 44cm and a large kit with nets sized at 170cm x 100cm. Alternate sized QuickShield nets are also available. AmSafe Bridport recommends that vehicles are supplied with both small and large kits to enable repair of a wide range of armour damage situations. QuickShield can be deployed with minimal training. A comprehensive training DVD is available and AmSafe Bridport can provide additional training support to meet specific customer needs.

NATO Stock Number	Product Number	Description	Size (cm)
2540-99-254-5688	ME40-0555225	QUICKSHIELD KIT SMALL	100 x 44
2540-99-428-5513	ME40-0555226	QUICKSHIELD KIT LARGE	170 x 100
