Fire Containment Pouch

Product

Fire Containment Pouch (FCP)

Application

Individual phones, laptops and battery packs

Hand held lithium battery powered devices have been recognized by industry regulators as a significant in-flight fire risk.

The Fire Containment Pouch has been developed for the protection of single batteries or devices, all of which have the potential to cause a fire.

Key features

- 01 Protects single batteries and devices from the threat of fire
- 02 Offers individual fire protection
- 03 Built to bespoke sizes and individual requirements
- 04 Compliments other fire containment products
- 05 Product life of three years
