

TARIAN® RPG ARMOUR

SUPERIOR PROTECTION – PROVEN

↘ ONE SOLUTION TO MANY CHALLENGES

Tarian® Rocket Propelled Grenade (RPG) Armour is the world's lightest highly effective solution for protecting vehicles against rocket propelled grenades (RPG's).

Tarian can be retrofitted, or incorporated into new platform designs, including lightweight vehicles.

Tarian has been extensively tested in Europe and North America, including hundreds of live RPG shots and arduous vehicle trials. This thorough testing has verified both a superior protection performance compared to traditional RPG armour and a multi-hit capability. Tarian has been in service with the British Army since 2009.

TARIAN ARMOUR NET

Lightweight

The patented Tarian RPG Protection System can weigh as little as 5.7kg/m² (1.2 Lbs/ft²), offering weight savings to vehicles currently fitted with RPG protection that can restore vehicle performance, improve reliability, reduce maintenance down time and cost or enable additional equipment and protection to be added elsewhere on the vehicle. Tarian allows the lightest vehicles to be protected from RPG's. Until now, these vehicles could not bear the weight of RPG armour systems. Fitting Tarian increases the operational scope of these vehicles by enabling them to be deployed in high-threat RPG environments.

Cost Effective – cutting edge technology, reduced through life cost

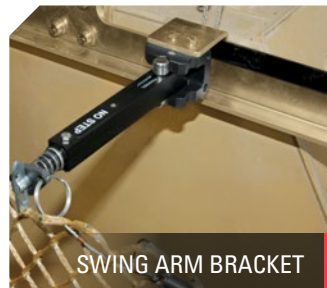

Less damage, fewer spares, reduced logistics burden and reduced vehicle maintenance ensures Tarian provides outstanding through life cost benefits. Further value is provided by the unique provision of a low cost training net, which replaces Tarian armour during training.

Operationally Durable

Tarian's mounting system utilises proprietary Swing Arm Brackets that allows the system to survive impacts that would render other systems un-serviceable. This innovative solution improves operational effectiveness, maintains protection and saves money. Tarian Armour Nets are highly resistant to damage. Tarian is simple to fit and replace without special tools ensuring training requirements are minimised. Transport and storage problems are also greatly reduced due to the unique fold flat design.

Our Expertise

Our experience shows that a collaborative development environment, which fully utilises both customer and AmSafe Bridport's knowledge and expertise, produces the most efficient Tarian RPG armour solution. From initial development of system requirements to the delivery and support of the system, AmSafe Bridport will manage your project to ensure that your Tarian RPG armour system is delivered on schedule and in accordance with agreed performance requirements.
